Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17 and 20-27, drawn to a method of stabilizing an intervertebral joint, classified in class 606, subclass 61.
- II. Claims 18, 19 and 28-66, drawn to a particular instrument guide, its use and kit containing instrument guide, classified in class 606, subclass 96.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MEP. § 806.05(e)). In this case the claimed method requires none of the particulars of the distinctly claimed instrument guide and could be performed with a prior art instrument guide such as that disclosed by applicant's cited art to Michelson (5,484,437) or Kuslich et al (5,489,307).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
